

Practice Exam # 2.

This is twice too long, but at the right level.

I have only listed the problems, and part of your study might be to write out the problems for two practice exams from this list, and then take those exams. For instance, both exams will have problems from sections 10.5, 11.1, 11.3, 11.4, 11.5, but you will choose which practice exam to put the others on.

Recall that one issue on exams is to recall the material of the right section.

10.4 # [4,5,6,7,8] [← ONE PROBLEM worth 5 points]

10.5 # 7, 21

10.6 # 3

10.7 # 5 [no need to calculate **B**]

11.1 # 7, 23, 37

11.2 # 39

11.3 # 27, 49

11.4 # 5, 19

11.5 # 7, 17, 33
